Summary

B. Tech student specializing in Artificial Intelligence and Machine Learning with strong problem-solving, logical thinking, and analytical skills, experienced in analyzing data and building structured, real-world solutions. Skilled in designing and deploying scalable applications on AWS and Google Cloud using Docker, Terraform, Ansible, and Jenkins, focusing on automation, CI/CD, and Infrastructure as Code. Proficient in Python and SQL, with the ability to work both independently and in teams, seeking a Cloud/DevOps Internship to build efficient and scalable systems.

Technical Skills

Amazon Web Services: EC2, S3, RDS, IAM, VPC, Lambda, CloudWatch, Auto Scaling.

DevOps & Automation: CI/CD (Jenkins, GitHub Actions), Terraform (IaC), Ansible, Bash.

Languages: Python, Java, C

AI & ML Tools: Amazon Rekognition, Amazon Lex, Amazon Bedrock, Amazon Textract, Amazon Comprehend, TensorFlow

Web Development: HTML, CSS, JavaScript, React, REST APIs

Projects

Multi-Cloud Disaster Recovery

(Jan 2025 – Mar 2025)

Designed and implemented a multi-cloud disaster recovery architecture (AWS + GCP), improving availability and reducing downtime by 30%, with cross-cloud redundancy and failover mechanisms. Automated backup of AWS S3 (bucket) and EC2 (instance) data to Google Cloud (bucket, Virtual Machine), ensuring high availability, fault tolerance, and minimal data loss. Configured automated synchronization, health monitoring, and disaster recovery testing workflows to ensure seamless failover and rapid service restoration during outages.; Tools: Amazon Web Services and Google Cloud

Dog Breed Classification System

(Sep 2024 – Nov 2024)

Built and trained an image recognition model for dog breed classification, achieving 85% accuracy and improving performance by 20% using Amazon Rekognition Processed and analyzed multiple image datasets to optimize prediction accuracy and model efficiency. Developed an automated image processing pipeline for dataset preprocessing, model evaluation, and real-time breed prediction using AWS cloud services; Tools: AWS (Amazon Rekognition)

AI Chatbot for Hospital Appointment Booking

(May 2024 – Jul 2024)

Developed an AI-powered chatbot for hospital appointment booking, reducing manual scheduling effort by 40% and enabling real-time conversational responses. Enhanced functionality with symptom-based suggestions and hospital recommendations. Integrated intent recognition, appointment scheduling workflows, and dynamic response generation to improve user experience and reduce response time; Tools: AWS (Amazon Lex)

Certifications

- AWS Developer Associate, AWS AI Practitioner - **Amazon Web Services**
- Java Programming, Generative AI Professional - **Oracle Academy**
- Python - **Infosys Springboard**
- HTML and CSS Certiport - **Pearson VUE Business**
- C Programming Language - **Cisco Networking Academy**

Internship Experience

AWS Development with DevOps- Technical Hub Pvt Ltd

(May 2025 – June 2025)

AWS Development with DevOps, working with services like EC2, S3, IAM, and CloudWatch for application deployment and management. Learned cloud architecture, automation, CI/CD, and Infrastructure as Code concepts to build reliable systems.

Education

B. Tech – Aditya College Of Engineering And Technology

(Jul 2023- May 2027)

- **Coursework:** Artificial Intelligence And Machine Learning
- **CGPA:** 7.87/10
